Scandrill Standardizes Rig Fleet on Puradyn® Engine Oil Filtration Systems; Achieves Five-fold Increase in Oil Drain Intervals to 5,000 Hours

Houston, TX & Boynton Beach, FL – December 1, 2017 – Scandrill, Inc. and Puradyn Filter Technologies Incorporated

([OTCQB: PFTI](#)) announced today that the Houston and Tyler, Texas-based drilling contractor, Scandrill, Inc., has standardized on Puradyn patented oil filtration systems for all engines in its 15-rig fleet. Scandrill's recently christened state-of-the-art [Scan Quest](#) as designed with the Puradyn System installed as part of the total package for their rig power.

Scandrill President and COO, Paul M. Mosvold, said, "Scandrill is committed to work safely and protecting our environment, and Puradyn provides a product that helps with those commitments, especially the environment. All of our rigs have incorporated the Puradyn System and because of it, we have been able to safely extend our oil drain intervals. Our new maintenance practices, with the help of the Puradyn Systems, allow extension of oil drain intervals to 5,000 hours from our previous practice of 1,000 hours. This reduces oil drains to virtually once per year, saving operating costs, and reducing the amount of waste oil generation. With the new Scan Vision Rig, as with all our rigs, we are focused on constantly improving our operating efficiency including improvements to maintenance, which this product assists. It's a win-win for our customers, the environment, and Scandrill."

Puradyn President and COO, Kevin Kroger, said, "Puradyn is proud to be a supplier to such a forward-thinking company. Their commitment to constant improvement and openness to accept advanced technology speaks volumes for Scandrill, now as well as in the future. Paul and his TEAM were very quick to accept the concept of engine oil bypass filtration, and have adopted their maintenance procedures to reflect the improvements in efficiency, productivity, and savings this concept brings to their business. We look forward to continuing our working relationship with Paul and his TEAM."

About Scandrill, Inc. (www.scandrill.com)

Since 1977, SCANDRILL, Inc. has provided land contract drilling services to independent and major oil and gas explorations companies in the Ark-La-Tex and Permian Basin. By fostering a culture of safety and learning, SCANDRILL has been able to reduce human error, lower turnover and decrease nonproductive time (NPT) throughout their fleet of 15 rigs.

About Puradyn Filter Technologies (www.puradyn.com)

Puradyn designs, manufactures and markets **puradYN**® Oil Filtration Systems, the most effective bypass oil filtration products available for internal combustion engines, transmissions and hydraulic applications. Puradyn systems continuously clean lubricating oil and replenish base additives to maintain oil viscosity to safely and significantly extend oil change intervals and engine life. Puradyn's patented, environmentally-conscious solutions deliver rapid return on investment by reducing oil consumption, maintenance and overhaul costs and engine downtime, while also protecting high-value engine assets. Puradyn filtration systems have been deployed on thousands of engines around the world, with principal applications in oil and gas drilling, pipeline compressors, generators, frac pump units, marine engines, mining and construction vehicles, semi-trucks and buses and hydraulic systems.
